

What the tempest is rally and for why xrally's sake do we care?!?

SCS Lightning Talk Series 2022

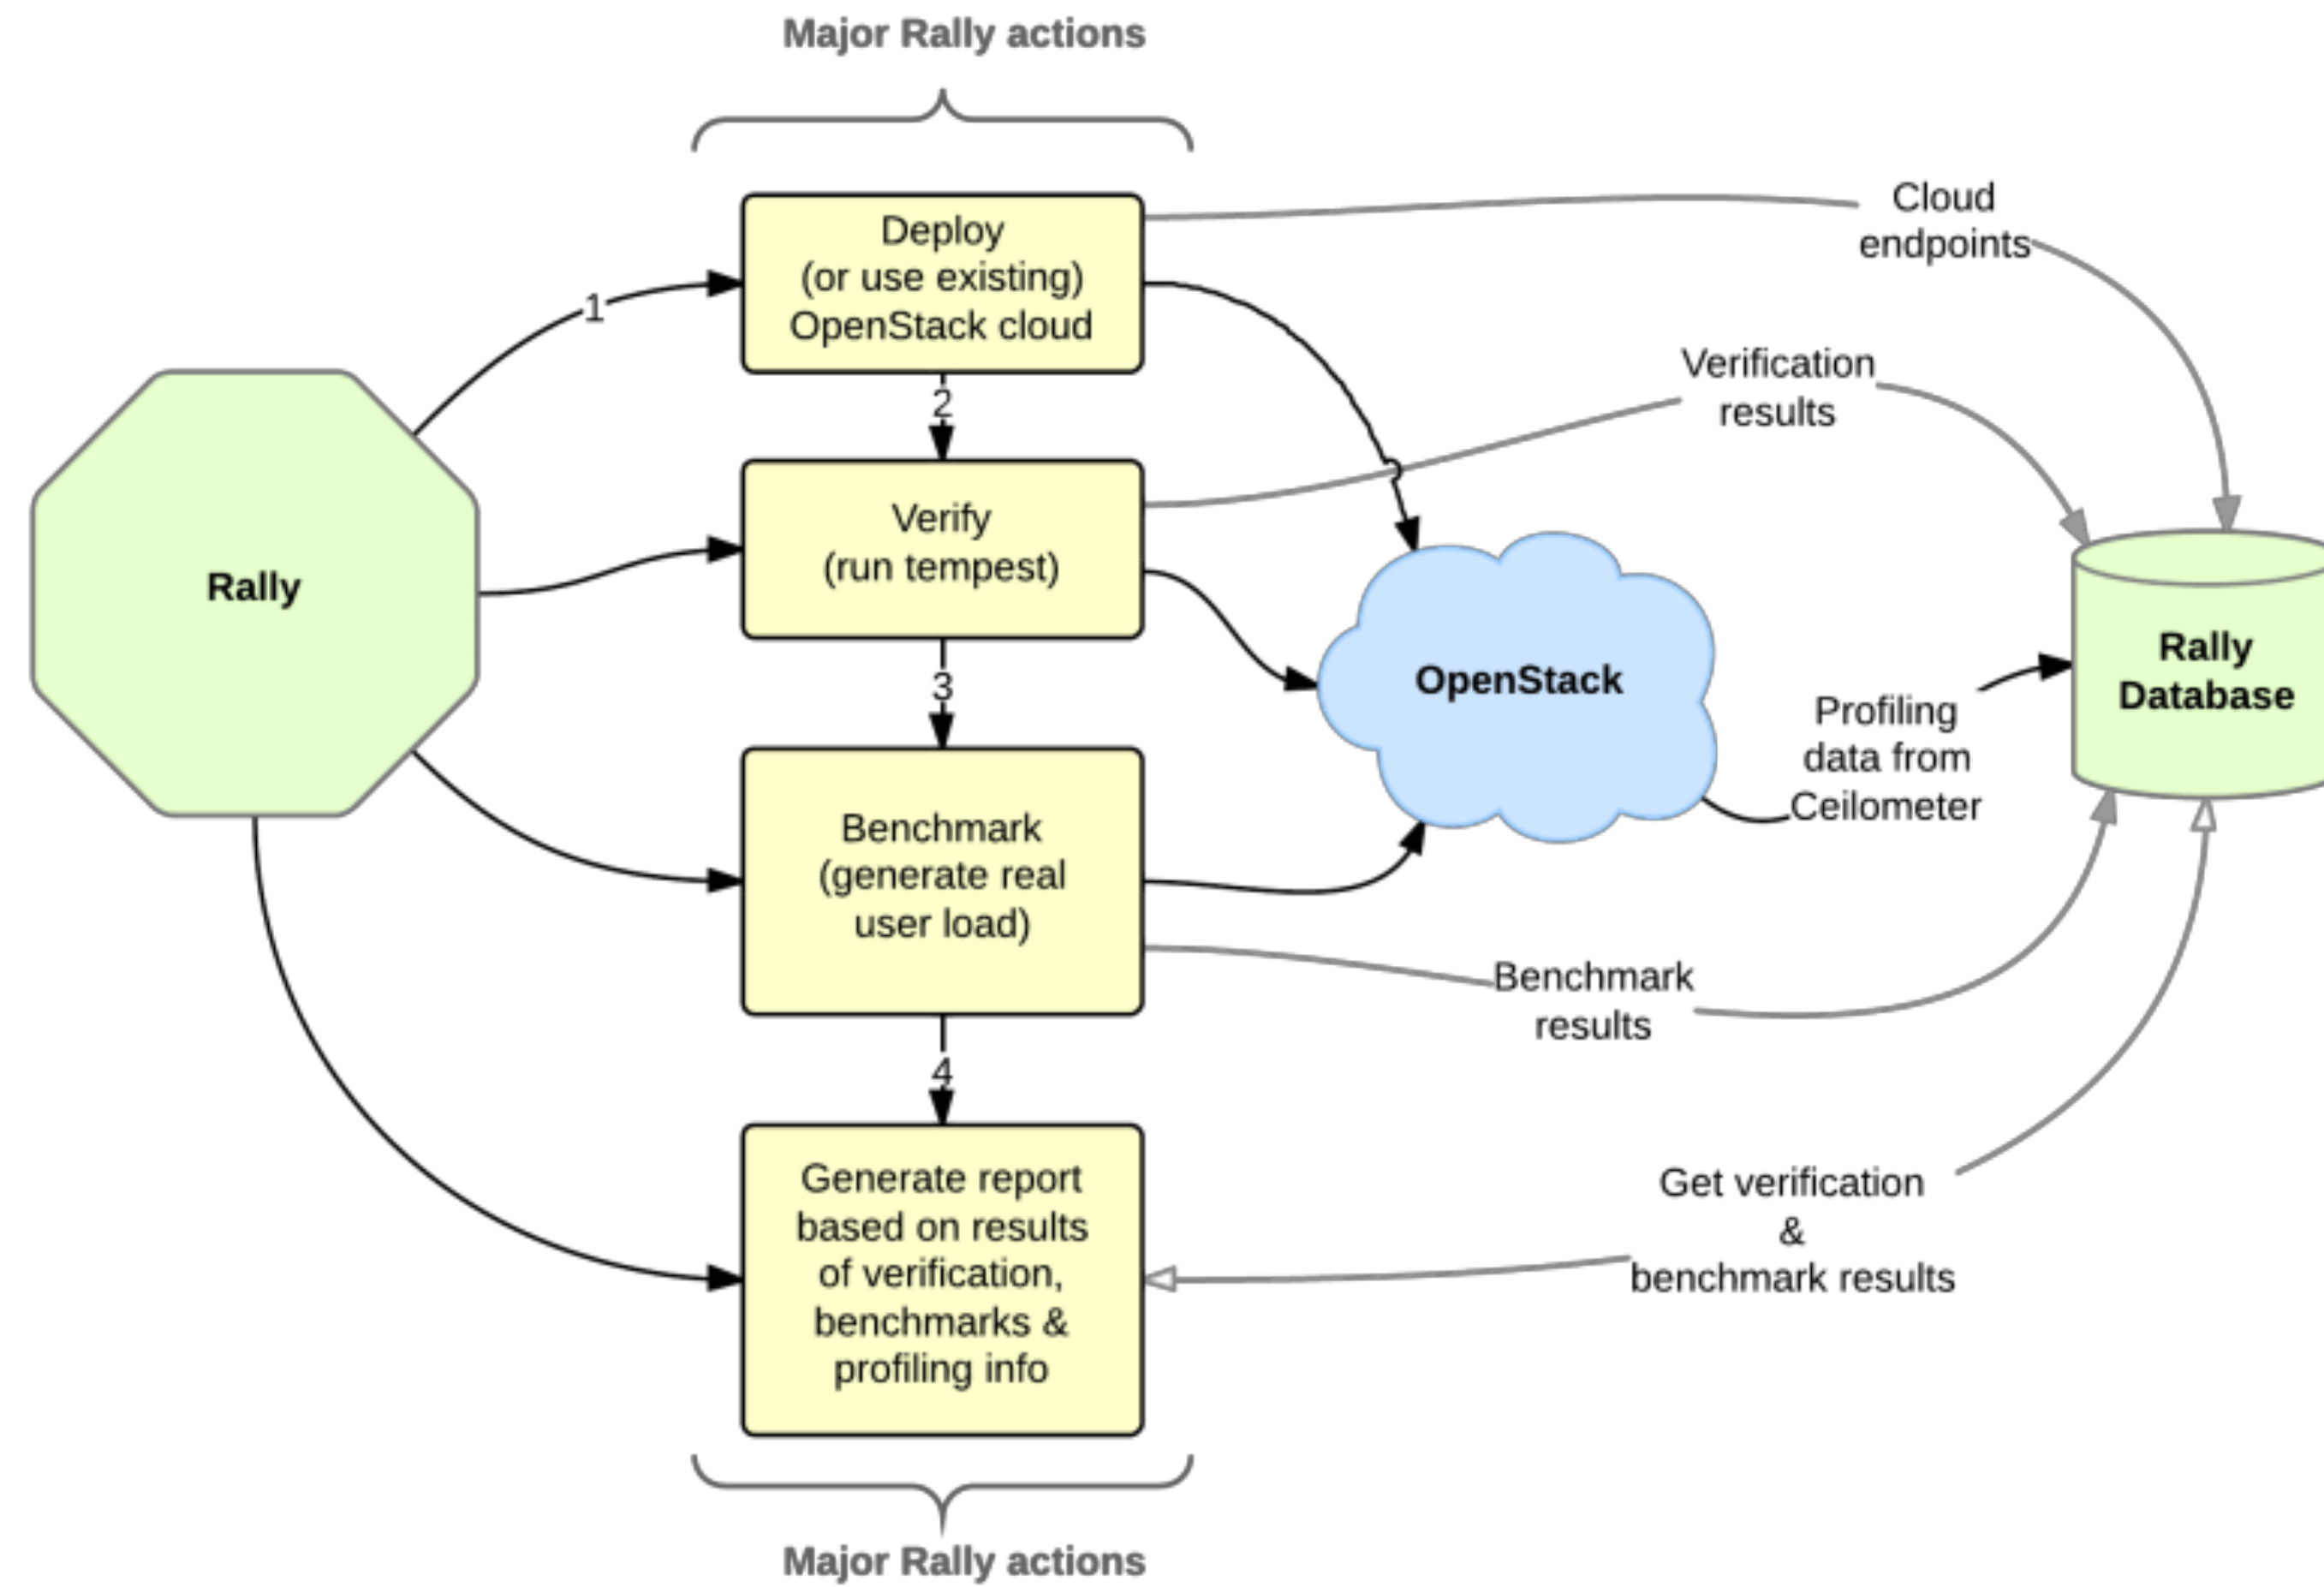

mathias & felix & andre & the rest ;)

tempest

- This is a set of integration tests to be run against a live OpenStack cluster.
- <https://opendev.org/openstack/tempest>
- <https://docs.openstack.org/tempest/latest/index.html>

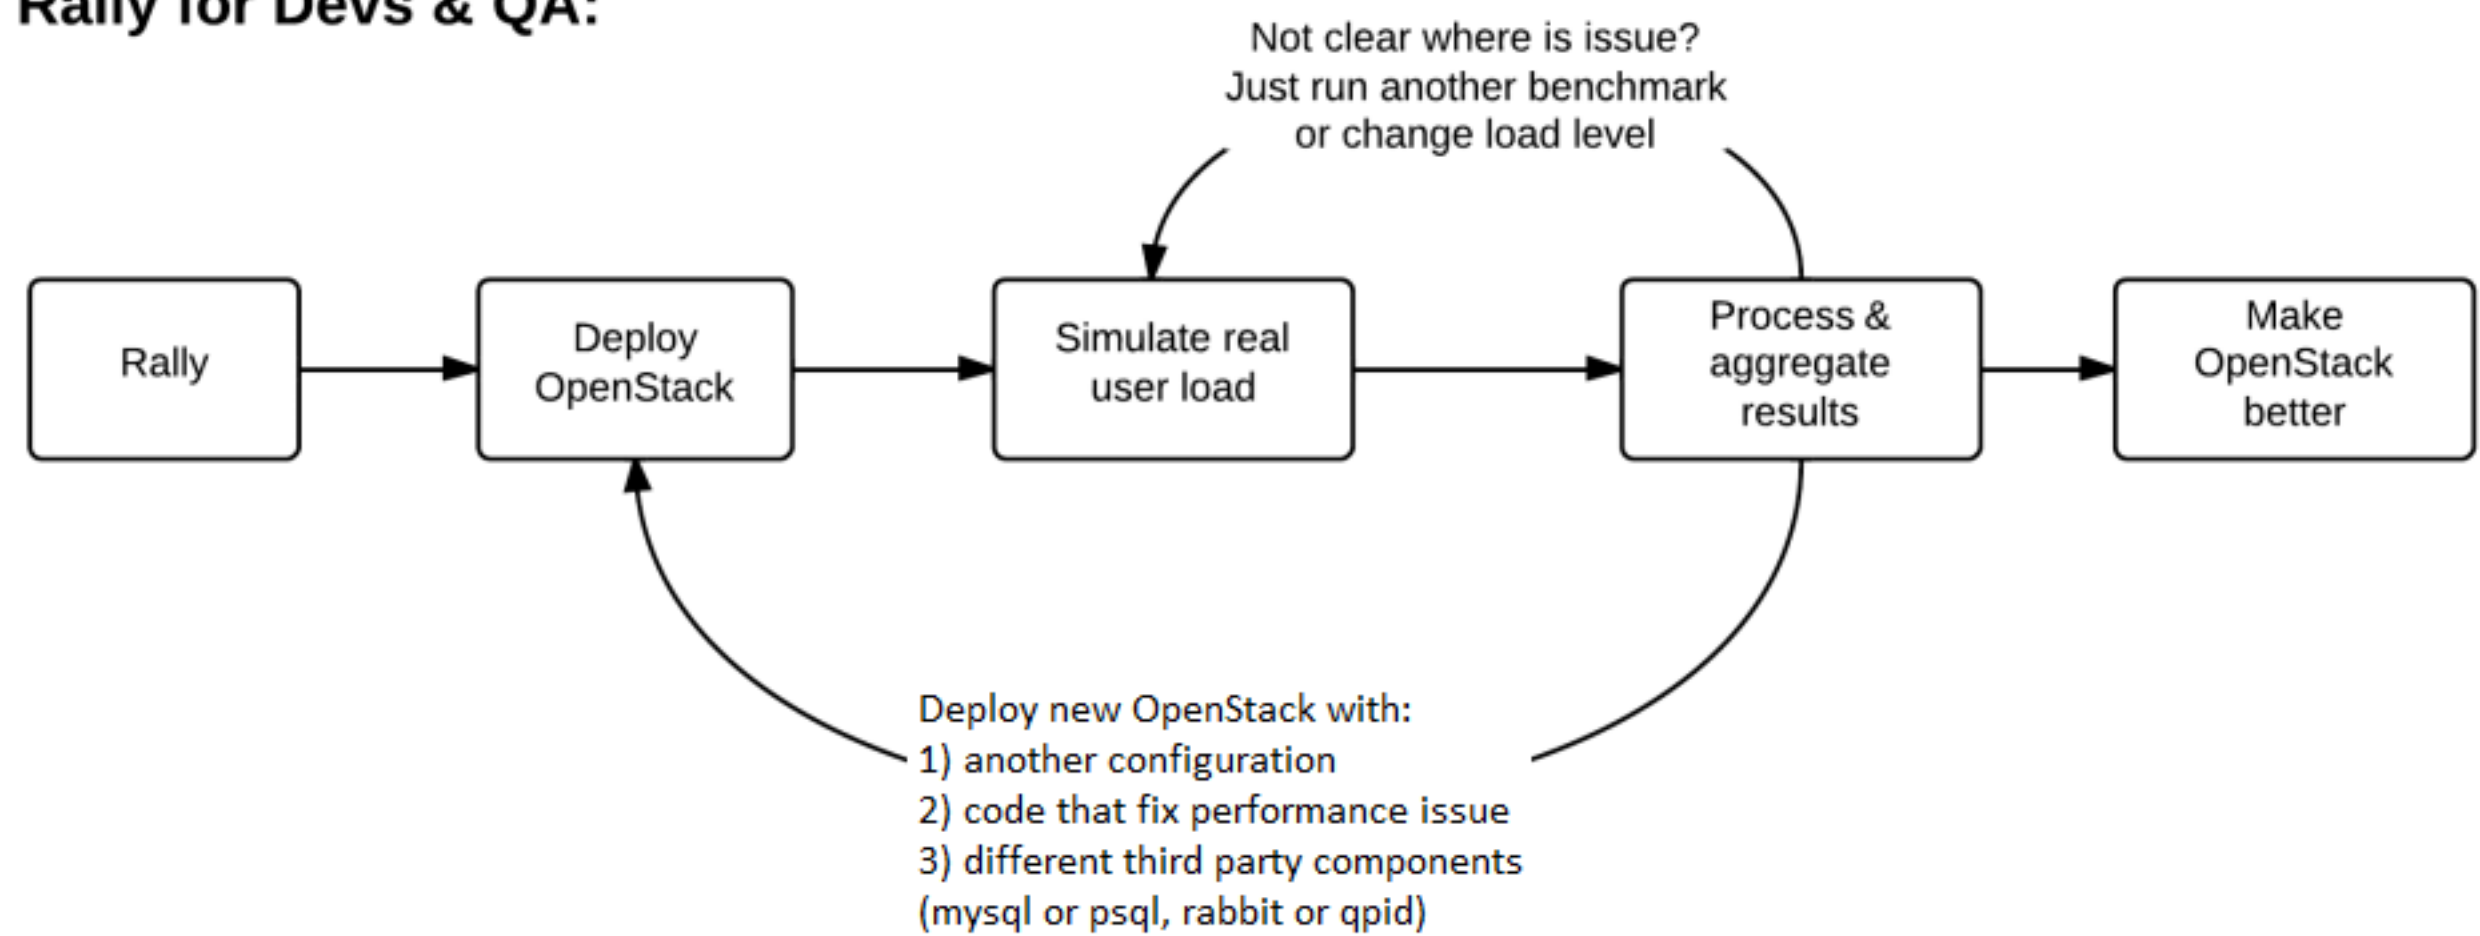

rally

- rally automates and unifies multi-node OpenStack deployment, cloud verification, testing & profiling.
- <https://opendev.org/openstack/rally>
- <https://docs.openstack.org/rally/latest/>

Rally for Devs & QA:

Rally for DevOps:

Rally CI/CD:

and xrally?

- xRally is based on the OpenStack Rally project that is used today by hundreds of companies for testing and monitoring services and applications. xRally extends Rally to support any cloud compute environment, including Kubernetes and public clouds such as AWS.
